Large Format Porcelain

CastleRock™
Insulated - Mortar-less
Stone - Porcelain - Brick Panels

Large Format Porcelain is the premier panel product for interiors and exteriors. It is economical, light weight, durable and inexpensive to install. The "one-piece" interlocking panels up to 48" x 118" install quickly with staples or screws eliminating complex tracks or brackets. They can be field cut to fit any circumstances or ordered in a custom sizes to simplify installation. Exterior panels are available with built-in rainscreen and up to R-30 insulation values. Porcelain will never dent, warp, peel, fade, discolor, require refinishing and offers graffiti resistance/removal and easy cleaning. Also, optional Hydrotect self-cleaning environment coating!

The most durable building material available today!

CastleRock
Insulated - Mortar-less
Stone - Porcelain - Brick Panels

No adhesives, No mortar, or complex tracks & brackets
"Just interlock and staple or screw to the wall!"

Large Format "One-piece" 3MM Porcelain Panels interlock and mechanically attach to the wall with staples, screws or Ramset to concrete/block. The durable panels won't easily scratch or dent and always look like new. Graffiti can usually be easily removed and are resistant to chairs or other objects, rubbing the finish off. The rich, dirt resistant porcelain finish easily cleans with water based household cleaners to restore the new look time after time. Porcelain makes an excellent long-term interior or exterior wall covering with low maintenance for many years to come.

Today's architecture is searching for unique, attractive exteriors to highlight the interior and exterior focal points in both commercial and residential buildings. Porcelain offers a solution with a superior economical product & low cost installation. A huge assortment of acid wash, granite, marble and solid colors offer a panel that will not dent fade, warp & never requires refinishing. Save time, energy & money while increasing comfort and reducing noise.
