

Insulated - Mortar-less

Medium Format Panels

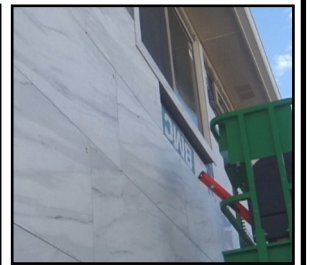

R-10 to R-30 Insulation Values

CastleRock Mid-Sized Porcelain Panels

Now a fast, easy way to get that expensive “quarried” stone look with a low maintenance insulated porcelain panel. The low cost installation eliminates grout, mortar & lathe. No complex bracket or rails, just interlock the 1-piece, insulated panels & staple or screw the hidden fasteners to the wall. The hidden ship lap joint seals to repel water, control expansion/contraction. The finished product is a beautiful, economical porcelain cladding with a lifetime finish that never needs repainting.

Panel sizes range from 12”x12” up to 24”x60”. There are numerous granite, marble and other stone, solid & textured porcelain looks to choose from. The best for less!
