

Mortar-less Insulated Stone Panels R- 5 to R-21

Insulstone™ uses the same manufactured stone as masons except it is bonded to an interlocking, insulated panel and attaches with staples or screws. This eliminates mortar, lathe and extreme amounts of labor. *InsulStone™* is an economical and more efficient way to install stone & if want, you can even install it yourself. It is available in R-5 to R-30 insulation values & a variety of styles and colors. The system is available with starter, corners, cap and penetration components for electrical, water & appliances.
