

*Insulstone™* uses the same manufactured stone masons use except it is bonded to an interlocking, insulated panel. This eliminates mortar, lathe and significantly reduced labor in the installation. This makes *InsulStone™* an economical and more efficient way to install stone on your projects. It is available in R-5 to R-30 insulation values & a variety of styles and colors. The system includes starter, corners, cap and penetration components for electrical, water & appliances. *Note:* Photos may vary from actual stone. see colors at your local dealership or contact us for samples.
