

InsulStone™ Natural Stone Panels

Mortar-less, Insulated, Natural Stone Panels R-10 to R-30 Insulation Values

Patents: US #8,176,701 & Canada #2,588,294

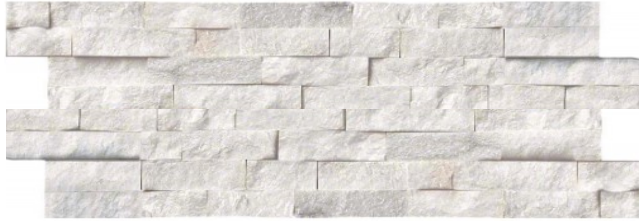

InsulStone mortar-less natural stone with insulation values up to R-30. Designed to exceed the new continuous insulation building codes. The mortar-less, interlocking panels attach to the wall with staples or screws instead of mortar & lathe. This installation method dramatically reduces labor cost and eliminates the cost of mortar & lathe. The dense insulation also reduces noise from the outside keeping your home or office quiet and peaceful. InsulStone Natural Stone is not only natural & more durable than synthetic stone, it is often less costly. So don't settle for less when you can have the best. Manufactured by InsulStone, Inc. for Crossville.
